The heart of the question is are you using Superfund funds for CERCLA responses? Oil for OPA? EPM ever? EPM always?

Hey Scott,
Thanks for asking. The OSC can verbally activate ASPECT (or TAGA). They mobilize and we issue a verbal scope of work (locations, analytes of concern or unknowns, describe the incident). Then we provide accounting and funds to cover the costs. I'll get a copy of a recent funding allocation and forward it over (cc'ing mgmt). Typically, our mgmt would submit and do the forms, since mgmt approves allocations of funds.

Monica/Chris, could you provide a recent funding For ASPECT and TAGA to the email distribution please.

Adam

Hi Adam:

We're trying to get more understanding about how the regions fund ASPECT, specifically what programs are used during ERs. I would guess it depends on the type of response, but I'd appreciate hearing from an OSC

first-hand. A recent ER comes to mind!

Can you discuss what was used to fund the recent ITC response, as well as any others you know about?

As you may be aware, we've lost a lot of our historic knowledge about ASPECT in previous days, and are just starting to learn what we don't know.

Thanks for your time and efforts on this.

Scott

Good question.

The Region would work directly with Tim to get their own \$ added to the contract. Not sure what type of funds they use.

This is a good opportunity to draft an SOP, tho!

Scott - Please have folks talk to Greg and R6 to understand the particulars and have an SOP drafted.

Thx.

How do regions pay for ASPECT? It's come up in the EMIT meeting twice. What type of money? Superfund? EPM? How?
